Fighting Fire and Water Damage With Soda Blasting

BY DENNIS TUDMAN

Damage caused to your building by fire, smoke and (or) water can be a devastating experience, both physically as well as emotionally. Each year thousands of structures are completely destroyed by fire, while many more are significantly damaged, but left with enough structural integrity to be salvaged. The process of erasing the scars left behind by this type of damage has been one with very few effective options until recent years.

When you consider the building's structure, particularly behind the walls, there is significant surface area that can be damaged or contaminated. All of the

individual cavities and spaces created by the framing members, as well as the hundreds of linear feet of wiring, ductwork and piping could require cleaning.

These fixtures could also be blocking other areas that need attention, further complicating the task at hand. The important point to consider is that in a fire while some surfaces may be spared from charring, almost none escape being contaminated by smoke. This means for this type of damage, effective cleaning would require a method that can reach absolutely everywhere.

When faced with having to remove a smoky odor from an object like clothing,

Got Damage from...

MOLD? FIRE? SMOKE?

Case Study:

Fire and Smoke Damage

Solution: SodaBlast Systems – environmentally friendly and even removes odor. Choose from a variety of systems at a price you can afford.

Results: Eliminate all odors and signs of Fire and Smoke. Restores property in a fraction of normal cleaning time – averages 19 sq. ft. per minute - 1140 square feet an hour. NO hazardous chemicals or waste.

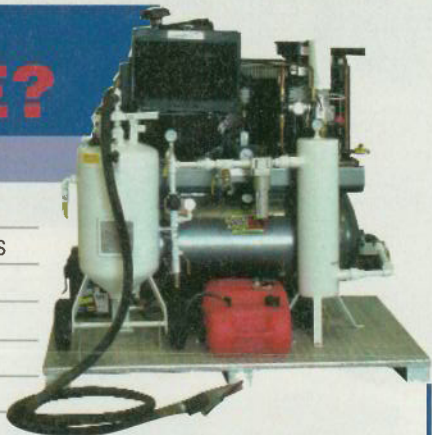

Media: Use a suitable abrasive for blast pot, from baking soda to multi media capable equipment. No need for Harsh Chemicals or Toxins!

Benefits

- Environmentally safe
- No Toxins or Harsh Chemicals
- Deodorizes
- Faster than normal methods
- Assets can be salvaged
- No residue
- No pre-treat

Applications

- Fire, Mold remediation
- Graffiti removal
- Surface Prep for applying anti-microbial coatings
- Crawl space to equipment – no space too small or large
- Handles walls, ceilings
- De-coats and cleans substrate in one step

Fire Before

Fire After
